

Production Process Overview

Product: Ready-to-Cook Chapati

1. Product Description

- **Type: Ready-to-cook chapati (partially cooked)**
 - **Have 3 different types of chapati and all 3 have different specification**
 - **Packaging format: MAP packs, vacuum sealed**
-

2. Process Flow

- 1. Flour procurement & storage**
 - 2. Dough mixing & resting**
 - 3. Sheeting/pressing**
 - 4. Partial baking (pre-cooking)**
 - 5. Cooling**
 - 6. Packaging**
 - 7. Storage & dispatch**
-

3. Production Capacity

- **Daily production: 70,000 units/day**
 - **Number of lines:5**
 - **Whole process is manual**
-

4. Key Quality Checkpoints

Stage	Parameter Checked	Method
Dough	Moisture	Manual
Sheeting	Thickness, diameter	Manual
Baking	Puffing %, Color	Visual inspection

Final Product	Texture, taste, shelf life	Sensory / lab
---------------	----------------------------	---------------

5. Current Quality Challenges

- Variation in moisture levels
- Inconsistent shape and size
- Overcooked and undercooked

6. Storage & Shelf Life

- Storage conditions: Ambient and Refrigerated
- Shelf life: 5-6days

7. Existing Quality Systems

- Current method: Manual
- Frequency of checks: Hourly

8. Expectations from Digital System

- Real-time data capture
- Standardized scoring system
- Automated reporting & dashboards
- Traceability (batch-wise tracking)
- Inform if something is not upto the requirement.
